Common AI Giveaways: Words and Phrases to Avoid

Want to quickly spot AI-generated content? Look for these telltale words and phrases that real humans rarely use in everyday writing:

Overused Introductory Phrases

- "It is important to note that..."

- "It is worth mentioning that..."

- "It should be emphasized that..."

- "As an AI language model..."

- "I don't have personal opinions, but..."

- "Based on my knowledge..."

- "In the realm of..."

Excessive Transitions

- "Furthermore"

- "Moreover"

- "Additionally"

- "Consequently"

- "Subsequently"

- "Nevertheless"

- "In addition to the aforementioned..."

Overly Formal or Academic Language

- "Utilize" (instead of "use")

- "Facilitate" (instead of "help" or "make easier")

- "Implementation" (instead of "using" or "doing")

- "Methodology" (instead of "method" or "approach")

- "Aforementioned" (instead of "this" or naming the thing again)

- "Plethora" or "myriad" (instead of "many" or "several")

- "Whilst" (instead of "while")

Hedging Language

- "It could be argued that..."

- "One might consider..."

- "To some extent..."

- "In many cases..."

- "Generally speaking..."

Overly Enthusiastic or Marketing-Speak

- "Revolutionary"

- "Game-changing"

- "Cutting-edge"

- "State-of-the-art"

- "Unprecedented"

- "Transformative"

- "Incredible"

Robotic Agreement

- "I understand your perspective completely."

- "You make an excellent point."

- "That's a great question."

- "You're absolutely right."

- "I'd be happy to assist with that."

Replacing these terms with more natural alternatives will instantly make your AI-generated content feel more authentic and human.
